Dear Readers:

Celebrating Pumping Services, Inc. 45th year in business this month, we continue to expand our business and support our customers by adding new products and new people. This month we introduce you the Mr. Denis Rehse who has joined our outside sales team, and our new distributor agreement with Brentwood Industries and Polychem brand for the New York and New Jersey area. Polychem Systems was founded in 1963 and quickly became a leading supplier of 100 percent non-metallic chain and flight collector systems. Brentwood acquired Polychem Systems in 2003, allowing the brand to build a reputation as the industry standard for performance reliability with innovations such as the SmartGuard Monitoring System and the SedVac Sediment Dredge System. For collection systems, Brentwood provides durable Polychem chain and flight systems for rectangular clarifiers and offers designs for specialized applications such as dissolved air flotation tanks and oil/water separators. Polychem non-metallic collector systems have earned a reputation as

the industry standard for performance and reliability. Whether it's providing cost-effective design recommendation for new clarifier construction or evaluating and retrofitting existing clarifiers, PSI along with Brentwood's team of engineers and sales personnel have the necessary knowledge and experience to help customers with projects of any size and scope.

PSI Represents Brentwood in New
York and New Jersey

Operating in clarifiers over 300 feet long and 33 feet wide, as well as in heavy-duty stacked clarifiers, Brentwood's top-quality Polychem products and components continue to produce field-proven results by handling the most severe sludge-loading and complex tank geometry situations.

Spotlight on

Polychem Engineered systems are comprised of the finest-quality, non-metallic components available in today's market, from rugged sprockets and head shafts to innovative chains and flight profiles. Brentwood's Polychem Systems Division is unsurpassed in the industry and Polychem is ISO 9001 Certified. Reliably constructed and economically designed, these products function efficiently as part of any clarifier system. We offer replacement components for competitors' equipment and perform on-site inspection for evaluation of wear conditions through our complete aftermarket sales service and retrofit program..

Polychem Systems Division is unsurpassed in the industry and Polychem is ISO 9001 Certified

PSI Process and Equipment is pleased to announce the appointment of Mr. Denis Rehse as sales engineer to the outside sales team. Denis has a Degree in Electrical Engineering from Virginia Tech and joined PSI recently. Denis has worked as a sales engineer in a related Industry for 13 years specializing in wireless communication systems for the Military, space and commercial applications.

Denis lives in Sussex County will be responsible for water and wastewater pumping and process treatment equipment applications in NJ and will lead PSI focus on supporting the water treatment customers and applications. Denis can be contacted at (732) 667-1820 and denis.rehse@psiprocess.com

Denis Rehse Joins PSI outside sales team to lead PSI focus in water treatment equipment applications.

99th NJWEA ANNUAL CONFERENCE, May 12 - May 16, 2014
